E-mail	: kwartarini_psy@ugm.ac.id
Teaching Assistant	: -
E-mail	: -
Location and Time	: Yogyakarta, Indonesia
Duration	: 14 weeks
Frequency of Meetings	: Once per week

Course Description

This course is designed to provide the students with the opportunity to understand the historical trends of mental health movement and examine the mental health concepts and related community-psychology intervention. Utilizing positive psychology theoretical framework, students are introduced to theoretical models of behavior, mental health hygiene, concepts of positive psychology and its dynamic, and social determinant of mental health. The fundamental understanding of a healthy individual within familial, school, workplace and community living as well as intercultural mental health will also be discussed. Finally, student will also learn basic advocacy skills in mental health.

Learning Outcomes:

1. Understand the historical background of mental health movement and the emerging of positive psychology
2. Understand the positive psychology framework and its theoretical concepts
3. Understand the form and mechanisms of social determinants of mental health and stigma and how it impacts to access to treatment
4. Understand the principle of advocacy in the context of mental health and community psychology.
5. Be able to apply the understanding of mental health in various settings and cultural background such as school, family, workplace and community.
6. Be able to establish cooperation to generate creative ideas to promote mental health in public sphere.
